# **Do you know of a family being adversely affected by the Children's Aid Society?**

**Do you know of a family that:**

- Has been adversely affected by the actions of the children's aid society, the family courts or by members of the legal profession?
- Has been devastated by legal bills or forced into bankruptcy as a result of court proceedings and litigation?
- Has had children taken away by CAS and placed into the foster care system or are under threat of having children taken away?
- Has had children who have been denied access by the CAS to speak to their parents or family members?
- Has been devastated by the litigation and injustices of the family courts?
- Has had false allegations, legal tricks, rules and procedures used to prevent the truth from being seen and justice served for the children.
- Has been told that the mother and father must separate and not talk to each other otherwise CAS will take their children away from them?
- Has a child who is being drugged and overmedicated while in CAS care?

**If you need help because of the CAS or know of someone who does, then contact the local Court Watch organization listed below. We provide information and assistance to children and families being wrongfully persecuted by Children's Aid workers and agencies.**
